

Human Body: Cardiovascular System Review

Essential Question: What is the structure and function of the cardiovascular system?

Objective: Review cardiovascular information for test preparation.

Without using any resources, write down what you remember about the cardiovascular system. Include:

1. Important organs and structures
2. Circulation pathways (pulmonary and systemic)
3. Major functions
4. Interactions with other systems
5. Common diseases and their pathologies
6. Comparisons of other animal circulatory systems.

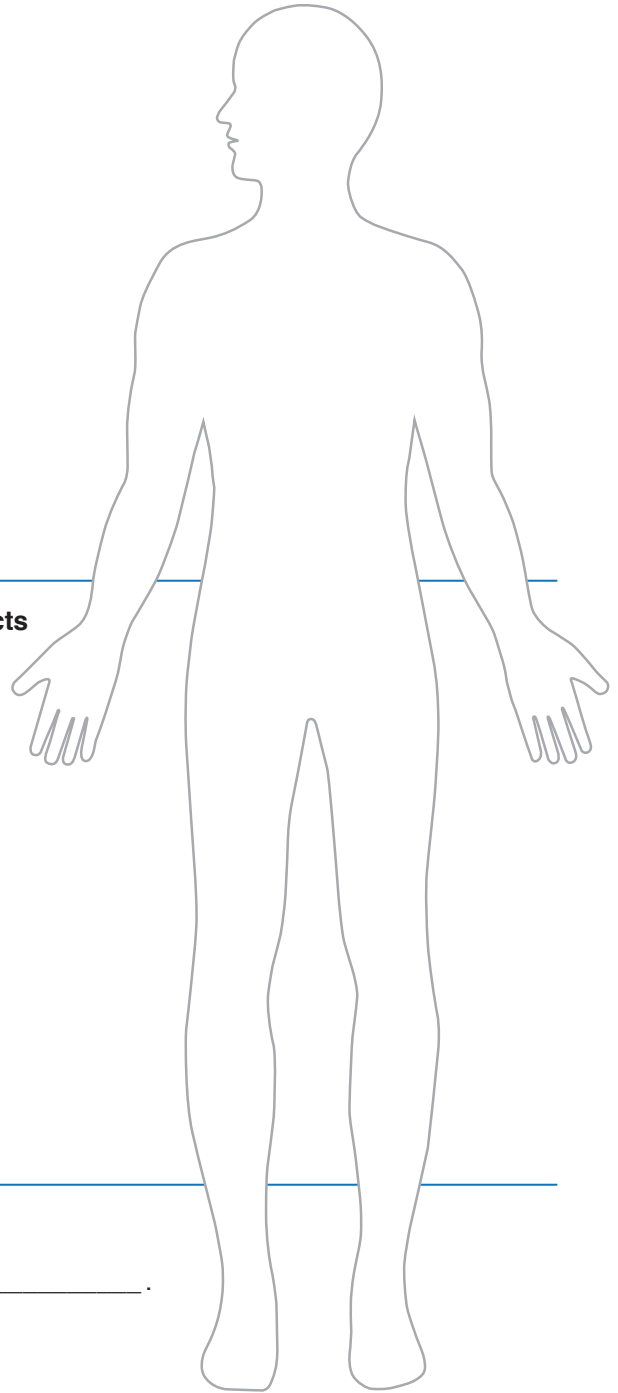

Using your notes, book, or online scientific resources, list 5 fun facts about the cardiovascular system.

- 1.
- 2.
- 3.
- 4.
- 5.

Complete the simile:

The cardiovascular system is like a(n) _____.

Explain your reasoning in 1–2 sentences.

Use this diagram for sketching and labeling.
